**30-day Public Review from  
January 10, 2025 to February 9, 2025**

- ♦ **4<sup>th</sup> Public Review ISC of BSR/ASHRAE/ASHE Addendum j to ANSI/ASHRAE/ASHE Standard 189.3-2021, *Design, Construction, and Operation of Sustainable High-Performance Health Care Facilities***

Material and product resilience is important in all types of building however healthcare facilities place additional strain on the selection of these component, because of infection risk based on pre-mature failure or inappropriate specification for the application based on the cleaning, sanitizing, and disinfecting requirements of healthcare spaces. This change requires the Materials section with subsequent recommendations to the Operations and Indoor Environmental Quality sections. New references are added for the user to comply with specifically rated cleaning products. The goal of the green cleaning and disinfecting plan is to identify disinfection products that are considered safer for use. The fourth public review address comments regarding the plan for use of disinfectants and cleaners as well as clarifying language addressing Scope 3 emissions.

A new errata sheet for the following standard is now available on the ASHRAE website at <http://www.ashrae.org/standards-errata>.
